MODULES

MODULE 1 - Authentication Module

1. **Sign up** - The user can create an account using the signup option and provide his credentials, which he can later use to log in.
2. **Login** - User needs to log in with his credentials to use the web app
3. **JWT authentication -** Authentication based on jwt when login and signup
4. **Middleware -** Protecting middlewares which checks users status and accessibility
5. **Password encryption -** Encrypt password before saving it to database while signup
